

Abdul Malik Muzakir

Bandung, West Java, Indonesia • (+62) 85723486958 • abdul.malik.djebreds@gmail.com

Software Engineer with nearly 3 years of experience specializing in back-end and mobile development. Proficient in NestJS, Ruby on Rails, Flutter, Vue.js, and Next.js. Skilled in designing scalable APIs, managing robust databases, and implementing secure authentication and authorization systems. Experienced in working with cross-functional teams, delivering high-quality, production-ready solutions, and optimizing system performance. Adaptable, fast-learning, and committed to clean code, maintainability, and industry best practices.

Experience

APRIL 2022 – JUNE 2022

Back-end Developer | PT. SINOVATIF • Internship | Bandung, West Java, Indonesia

Contributed to the full development and continuous enhancement of an employee attendance management system, working across all stages of the software development lifecycle. This included gathering and analyzing requirements, planning system architecture, implementing new features based on real user feedback, conducting thorough testing to ensure stability, and managing deployment and ongoing maintenance. Throughout the process, I focused on improving system performance, increasing data accuracy, and ensuring long-term reliability and scalability of the platform.

JULY 2023 – SEPTEMBER 2023

Back-end Developer | PT. Basic Technology • Freelance | Bandung, West Java, Indonesia

Led a small team to develop a comprehensive tax payment application. Responsibilities included gathering business requirements, creating system architecture and database design blueprints, and overseeing the integration of the Midtrans payment gateway. Involved in hands-on coding, implementing key features, and performing pre-project research.

JUNE 2023 - JUNE 2025

Back-end Developer | Four Vision Media • Contract | Bandung, West Java, Indonesia

Responsible for designing and developing scalable backend systems using NestJS and Laravel, supporting high-traffic applications for various clients. Worked closely with cross-functional teams, including front-end developers using Vue.js and Next.js, to ensure seamless API integration and efficient data flow. Implemented secure authentication mechanisms using JWT and OAuth, optimized database performance in PostgreSQL and MySQL, and conducted regular code reviews and unit testing.

JULY 2025 - CURRENT

Full Stack Engineer | MrScraper • Full Time | Los Angeles, California, United States

Building a centralized platform for monitoring large-scale data scraping, focusing on high request throughput and horizontal scaling. Implemented Kafka with multi-partition support to enable a Change Data Capture (CDC) workflow for efficient load distribution and high-volume data processing, while optimizing database pooling to ensure system stability under heavy traffic. The platform is built using a monorepo architecture with Next.js for the frontend and NestJS for the backend. My frontend contributions include developing a dynamic, responsive, and reusable UI component system with a minimal-code approach, and enforcing code quality standards using ESLint, Husky, and Conventional Commit to ensure a clean, consistent, and maintainable development workflow.

Skills

NestJS • Ruby on Rail • Laravel • Node.js • Vue.js • React.js • Next.js • Flutter • JavaScript • TypeScript • Dart • Python • SQL • PHP • PostgreSQL • MySQL • Firebase • Redis • Docker • Git (GitHub, GitLab, Gitea) • REST API • Swagger • Postman • System Design • Database Design • SDLC • Agile • Problem Solving • Team Leadership

Education

BANDUNG, INDONESIA | 2020 – 2023

SMK Negeri 1 Katapang | High School Diploma, Computer Software Engineering

I graduated with a focus on computer software engineering, where I learned the fundamentals of software development, algorithms, and data structures. My education included hands-on experience with web, desktop, and mobile application development, as well as exposure to IoT and robotics using Arduino. This background provided me with a strong technical foundation and practical skills that prepared me for a career in software engineering.

SOUTH JAKARTA, INDONESIA | 2025 – 2027

Cakrawala University | Bachelor Degree, Bachelor Degree of Computer Science

Certifications

Flutter & Dart - The Complete Guide [2024 Edition] — Udemy • Membuat Aplikasi itu Mudah — Flutter Indonesia, Udemy [2021] • NodeJS: Pemula Sampai Mahir — Programmer Zaman Now, Udemy • SQL Basic, SQL Intermediate, JavaScript Basic, Python Basic, CSS Basic, Problem Solving Basic — HackerRank

Honors

3rd Place Winner in the IT Company Competition

Languages

English — Limited Working Proficiency • Indonesian — Native • Sundanese — Native
